📄 Profile

I am a software developer with a strong passion for web development and a commitment to continuous self-improvement. I build projects using modern technologies such as Next.js, React, Tailwind CSS, and Supabase. In addition to a solid foundation in HTML, CSS, and JavaScript, I have experience in both front-end and back-end integration.

My goal is to create user-focused, efficient, and sustainable solutions while quickly learning new technologies and integrating them into projects.

📁 Project Experience

Solar Energy Inventory – Full Stack Developer

- Technologies Used: Next.js, React, TypeScript, Tailwind CSS, Leaflet, Recharts, Radix UI, Lucide React.
- Developed a map-based interface using Leaflet and OpenStreetMap.
- Implemented data visualizations with Recharts and toast notifications with Sonner.
- Designed a modern, accessible, and responsive user interface.
- This project was developed as the graduation project of the Samsung Innovation Campus Coding Program.

The Wild Oasis – Full Stack Developer

- Developed a fully-featured hotel management system using modern React techniques and React Query.
- Visualized reservations, sales, check-ins, and occupancy rates for the last 7, 30, and 90 days through a dashboard.
- Managed cabins, reservations, and guests; tracked user profiles and sales statistics.
- Integrated real-time data management and authentication using Supabase.
